

NOTES ON CONTRIBUTORS

Jean-Luc Chabert est Professeur de Mathématiques a l'Institut Supérieur des Sciences et Techniques de l'Université de Picardie, France, et cofondateur en juillet 1989 de l'Association Henri Poincaré pour l'Histoire et la Philosophie des Mathématiques et de la Physique moderne. Son domaine de recherches en Mathématiques est l'Algèbre commutative, et son domaine d'intérêt en Histoire des Mathématiques, les XIX^e et XX^e siècles.

I. Grattan-Guinness earned an M.Sc. (Econ.) in mathematical logic and the philosophy of science at the London School of Economics, and has both the doctorate (Ph.D.) and the higher doctorate (D.Sc.) in the history of science at London University. He is currently Reader in Mathematics at Middlesex Polytechnic, England. He was editor of the history of science journal *Annals of Science* from 1974 to 1981, and is founder–editor of the journal *History and Philosophy of Logic*, launched in 1980. An associate editor of *Historia Mathematica*, Dr. Grattan-Guinness also belongs to the editorial boards for the editions of the writings of C. S. Peirce and B. Russell. He is a member of the Executive Committee of the International Commission on the History of Mathematics. His latest book, of which he was both editor and a contributor, is *History in Mathematics Education* (Paris 1987), the proceedings of a workshop held in Toronto in 1983. He is currently working on the history of mathematical physics from 1790 to 1840, and mathematical logic and the foundations of mathematics from 1870 to 1930. The current President of the British Society for the History of Mathematics, Dr. Grattan-Guinness is also a corresponding member of the *Académie Internationale d'Histoire des Sciences*.

Jean-Claude Martzloff, a French sinologist, is a researcher of the National Center for Scientific Research (CNRS). He is the author of *A History of Chinese Mathematics (Histoire des mathématiques chinoises*, Paris: Masson, 1987). In 1984–1985 he obtained a research scholarship from the Japanese Society for the Promotion of Science (JSPS).

John McCleary is an associate professor of mathematics at Vassar College in Poughkeepsie, New York. His main area of research is algebraic topology. His main historical interest is the history of geometry. He is the author of *User's Guide to Spectral Sequences* and co-editor with David Rowe of *The History of Modern Mathematics*.

David E. Rowe is a former book review editor and currently managing editor of *Historia Mathematica*. He and Renate Tobies are coeditors of a forthcoming volume of selected correspondence between Felix Klein and Adolf Mayer to be published in *Teubner-Archiv zur Mathematik*. With Karen Parshall he is completing work on *The Emergence of an American Mathematical Research Community: J. J. Sylvester, Felix Klein, and E. H. Moore*, which is scheduled to be published by the American Mathematical Society.
